# 2. Absolute maximum ratings

| Parameter             | Symbol          |      | Value | s    | Unit | Remark  |
|-----------------------|-----------------|------|-------|------|------|---------|
|                       |                 | Min. | Тур.  | Max. |      |         |
| Power voltage         | V <sub>cc</sub> | -0.3 | -     | 6.0  | V    | At 25°C |
| Input signal voltage  | $V_{LH}$        | -0.3 | -     | 4.3  | V    | At 25°C |
| Operating temperature | Тор             | 0    | -     | 50   | °C   | Note 1  |
| Storage temperature   | T <sub>ST</sub> | -20  | -     | 60   | °C   | Note 2  |
| CCFL Current          | ICFL            | 2    | 7.5   | 8    | [mA] |         |

Note 1: The relative humidity must not exceed 90% non-condensing at temperatures of 40°C or less. At temperatures greater than 40°C, the wet bulb temperature must not exceed 39°C.

Note 2: The unit should not be exposed to corrosive chemicals.

# b. Display color vs. input data signals

The brightness of each primary color (red, green and blue) is based on the 8-bit gray scale data input for the color; the higher the binary input, the brighter the color. The table below provides a reference for color versus data input.

|                 |   |                                 |                                 |                                 |                                 |                                 |                                 |                                 |                                 |                            |                                 | Inp                             | ut (                            | cole                       | or d                            | lata                            | ì                               |                                 |                            |                            |                                 |                                 |                                 |                            |                                 |

| Horizontal | T <sub>H_TOTAL</sub> | H total pixel number | 1400 | 1560 | 1800 | DClk           |
|            | T <sub>H_DATA</sub>  | Data duration        | _    | 1366 | (+)  | DClk           |
|            | T <sub>HB</sub>      | H-blank              | 40   | 194  | 434  | DClk           |

Note: Because this module is operated by DE only mode, Hsync and Vsync input signals should be set to low Logic level or ground. Otherwise, this module would operate abnormally.

| Lamp operation current | IL       | 2     | 7.5  | 8    | mArms  |          | Note 3       |
| Lamp starting valtage  | \/Loto#t | 1300  | -    |      | \/rm00 | T = 25°C | Note 4,5,6,7 |
| Lamp starting voltage  | VLstart  | 1700  | -    | -)   | Vrms   | T = 0°C  | Note 4,5,6,7 |
| Frequency              | F        | 40    | -    | 60   | KHZ    |          | Note 7       |
| Lamp life time         |          | 50000 |      | -    | Hr     |          | Note 8       |

Note:•• The waveform of the voltage output of inverter must be area-symmetric and the design of the inverter must have specifications for the modularized lamp. The perform`\*ance of the Backlight, such as lifetime or brightness, is greatly influenced by the characteristics of the DC-AC inverter for the lamp. All the parameters of an inverter should be carefully designed to avoid producing too much current leakage from high voltage output of the inverter. When designing or ordering the inverter please make sure that a poor lighting caused by the mismatch of the Backlight and the inverter (miss-lighting, flicker, etc.) never occurs. If the above situation is confirmed, the module should be operated in the same manners when it is installed in your instrument.

Note 1: Specified values are for a single lamp.

Note 2: Operating voltage is measured at the condition of Ta =  $25\pm2^{\circ}$ C. The variance of the voltage is  $\pm10\%$ .

Note 3: The degree of unbalance: less than 10% The ratio of wave height: less than  $\sqrt{2} \pm 10\%$ 

lp: high side peak

I-p: low side peak

The degree of unbalance = |Ip-I-p| /Irms\*100(%)

The ratio of wave height = Ip (or I-p)/Irms

Lamp should be completely turned on.

MT185GW01 V.B SPEC NO.

PAGE 14/23

Note 4: Test equipment: AS-114B

Note 5: The voltage shown above should be applied to the lamp for more than 1 second after startup. Otherwise, the lamp may not be turned on normally.

Note 6: Inverter should provide more than min. value, and then lamp could be completely turned on

Note 7: Lamp frequency may produce interference with horizontal synchronous frequency and this may cause line flow on the display. Therefore lamp frequency shall be detached from the horizontal synchronous frequency and its harmonics as far as possible in order to avoid interference.

Note 8: Life time (Hr) is defined as the time when brightness of a lamp unit itself becomes 50% or less than its original value at the condition of Ta =  $25\pm2^{\circ}$ C and I<sub>L</sub> = 7.5mArms.

Backlight connecter: 3500IHS-02L

| White uniformity (9)    | $\delta_{W}$ |           | 0.75          | 0.80  | -       |      | Note 3,8   |
| Cross talk              | Ct           |           | -             | _     | 2%      |      | Note 9     |

Note 1: Ambient temperature = 25°C.

Note 2: To be measured in dark room after backlight warm up 30 minutes.

Note 3: To be measured with a viewing cone of 2°by Topcon luminance meter BM-5A.

Note 4: Definition of response time:

The output signals of BM-7 are measured when the input signals are changed from "Black" to "White" (falling time) and from "White" to "Black" (rising time), respectively. The response time interval is between the 10% and 90% of amplitudes. Refer to figure as below.

Note 5: Definition of contrast ratio:

Contrast ratio is calculated by the following formula.

Contrast ratio (CR)= Brightness on the "white" state
Brightness on the "black" state

Note 6: Driving conditions for CCFL: I<sub>L</sub>= 7.5 mA, 50 KHz Frequency.

Note 7: Definition of viewing angle

Note 8: Definition white uniformity:

Luminance are measured at the following nine points (P1~P9).

**②** 

Note 9:

I  $L_A$ - $L_{A'}$  I /  $L_A$  x 100%= 2% max.,  $L_A$  and  $L_{A'}$  are brightness at location A and A' I  $L_B$ - $L_{B'}$  I /  $L_B$  x 100%= 2% max.,  $L_B$  and  $L_{B'}$  are brightness at location B and B' Note 10: Optical characteristic measurement setup.

|                               | One time each direction                       |          |        |
| MTBF Demonstration            | 50,000 hours (Typ.) with confidence level 90% | Note 1   | Note 3 |

Note1: Pass: Normal display image with no obvious non-uniformity and no line defect.

Partial transformation of the module parts should be ignored.

Fail: No display image, obvious non-uniformity, or line defects.

Note2: Evaluation should be tested after storage at room temperature for one hour.

Note 3: The MTBF calculation is based on the assumption that the failure rate distribution meets the Exponential Model (CCFL excluded)

SPEC NO. MT185GW01 V.B PAGE 19/23

### E. Safety

#### (1) Sharp Edge Requirements

There will be no sharp edges or corners on the display assembly that could cause injury.

#### (2) Materials

#### a. Toxicity

There will be no carcinogenic materials used anywhere in the display module. If toxic materials are used, they will be reviewed and approved by the responsible InnoLux Toxicologist.

#### b. Flammability

All components including electrical components that do not meet the flammability grade UL94-V1 in the module will complete the flammability rating exception approval process. The printed circuit board will be made from material rated 94-V1 or better. The actual UL flammability rating will be printed on the printed circuit board.

#### c. Capacitors

If any polarized capacitors are used in the display assembly, provisions will be made to keep them from being inserted backwards.

## F. Display quality

The display quality of the color TFT-LCD module should be in compliance with the Innolux's Incoming inspection standard.

### G. Handling precaution

The Handling of the TFT-LCD should be in compliance with the Innolux's handling principle standard.

- (a) Model Number: MT185GW01
- (b) Version: V.B

Serial ID includes the information as below:

- Manufactured Date: Year: 0~9, for 2000~2009
- 2. Month: 1~9 & A~C for Jan.~Dec.
- 3. Date: 1~9 & A~Z (exclude I, O, Q, U) for 1st~31th
- 4. Code of grade: 1, 2, 3, 5, E
- Serial No: Module manufacture sequence no
- (d) Serial ID II (INL internal use)

SPEC NO. MT185GW01 V.B 21/23 PAGE

### (2) Carton Label

(a) Model Number: MT185GW01

(b) Version: V.B

(c) Packing quantity: 7 pcs

Serial ID includes the information as below:

(a) Manufactured Date: Year: 0~9, for 2000~2009

Month: 1~9 & A~C for Jan.~Dec.

Date: 1~9 & A~Z (exclude I, O, Q, U) for 1st~31th

(b) Code of grade: 1,2, 3, 5, E

(c) Serial No: Module packing sequence no
